SUMMARY

Computer Science Engineering graduate with hands-on experience in Python, Machine Learning, and data analysis. Skilled in building predictive models and data-driven applications using Python, SQL, and PyTorch. Strong foundation in programming, problem-solving, and software development, with an interest in AI and backend development.

SKILLS

Programming Languages : Python, SQL, Java, R
AI/ML : Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn, OpenCV, PyTorch
Backend&Databases : FastAPI, RESTful API, MySQL, Oracle, JSON
Tools& Platforms : Git, GitHub, Google Colab, Visual Studio Code, Jupyter Notebook, Excel, Power BI
Soft Skills : Problem-solving, Communication, Teamwork, Adaptability, Leadership, Critical Thinking

EDUCATION

Andhra University College Of Engineering - B.Tech (CSE) - (GPA: 8.8) 2026
Sri Chaitanya Junior College - Intermediate (MPC) - (GPA: 9.66) 2022
Bethany School - Class X (ICSE) - (GPA: 9.52) 2020

INTERNSHIPS

Data Analysis using Python, Andhra Pradesh State Skill Development Corporation May 2025 — Jul 2025
Python Programming Intern, I&T Labs Mar 2024 — Aug 2024

PROJECTS

Plant Disease Detection Using Deep Neural Networks | Python, PyTorch, Streamlit

- Developed an AI-based image classification system using PyTorch and deep neural networks to detect plant diseases from leaf images.
- Implemented and evaluated a custom CNN and MobileNetV2 model for multi-class image classification.
- Applied image preprocessing and augmentation techniques including image resizing and random horizontal flipping.
- Achieved 96% classification accuracy using MobileNetV2, outperforming the custom CNN model.
- Built a Streamlit application for image upload and automated disease prediction.

Heart Disease Prediction | Python, Pandas, Scikit-learn

- Developed a Machine Learning classification model using Logistic Regression to predict heart disease risk from clinical data.
- Performed data preprocessing, validation, missing-value checks, and exploratory analysis using Pandas
- Applied an 80:20 stratified train-test split and evaluated model performance using accuracy score.
- Implemented a predictive system capable of generating heart disease risk predictions for new patient inputs.

Walmart Sales Data Analysis | Python, Pandas

- Analyzed Walmart's sales data across multiple stores and departments to identify trends and seasonal performance variations.
- Preprocessed large datasets by handling missing values, converting data types, and engineering features (month, year, holiday).
- Performed exploratory data analysis (EDA) to identify peak sales periods, holiday effects, and store-wise performance.
- Visualized trends using time series plots, bar charts, and heatmaps to effectively communicate findings.

CERTIFICATIONS

Data Analysis using Python, Infosys Springboard Mar 2026
Data Analytics and Visualization Job Simulation, Accenture (Forage) Oct 2024
Introduction to Data Science, CISCO May 2024

ACHIEVEMENTS

- Scored 99.31 percentile in Naukri Campus Young Turks 2025, awarded Certificate of Merit in India's largest national skill contest organized by Naukri Campus.
- Selected among the Top 5 teams in the internal SIH 2024 hackathon, contributing to the development of an interactive solution for making constitutional learning easier and more engaging.
